KEY THEMES

Digital Mines: Building a Fully Autonomous Mine From Pit to Port

Gold Field's IIoT Deployment Strategies in Gold Mines

How Anglo American Realizes Major Benefits in Automation

Improving Mining Operations with Big Data Analytics

Roy Hill's Case Study on Artificial Intelligence in Mining Explorations

How Drones Are Changing Mineral Surveillance, Site Operations and Monitoring

Mines of the Future: 5G Fully Autonomous Mines by 2020

Improving Mining Asset Performance with Data Analytics

Workplace Safety with IIoT Innovations

Intelligent Mining with Big Data Analytics

Integrating IIoTs with Miners to Track Efficiencies, Output and Productivity

Safety Regulation in the Autonomous Mines

Mining Chief Tech Officer Panel Discussion

200+ DELEGATES

THE CONFERENCE AT A GLANCE

DAY 1: WEDNESDAY, 10 APRIL 2019

MAIN CONFERENCE

- Keynote: Intelligent Mines - Building a **Fully Autonomous Mine** From Pit to Port
- How Anglo American Realizes **Major Benefits in Automation**: From Autonomous Haulage to Driverless Trains
- **Integrating IoTs with Miners** to Track Efficiencies, Output and Productivity
- How **Big Data & Cloud for Mining & Metallurgical Operations** Enable Intelligent Mining
- How **Drones Are Changing the Art of Mineral Surveillance**, Equipment Maintenance, Operations Monitoring and Site Mapping
- Mining Chief Tech Officer **Panel Discussion**

DAY 2: THURSDAY, 11 APRIL 2019

MAIN CONFERENCE

- Improving Mining Asset Performance with **Predictive Maintenance and Analytics**
- Gold Mine **IIoT Deployment Strategies**. Why and How Deployments Succeed with Case studies
- **Artificial Intelligence in Mining** and Metallurgical Operations, with Case Studies
- **Safety Regulation** in the Autonomous Mines of Western Australia
- How **IoT is Revolutionizing Workplace Safety**

DAY 3: FRIDAY, 12 APRIL 2019

SITE VISIT

- Digital Mining Automation Equipment Site Tour

Dear Mining Colleagues,

Digital transformation is emerging as a driver of sweeping change in the world across many traditional industries. Within the mining industry, digitalization is becoming a force that changes the nature of companies and their interaction with employees, communities, government and the environment at every step of the value chain. From mineral exploration and valuation, through mining, ore processing and production, to satellite remote control and sensing, digitalization is blurring traditional industry lines and challenging the business models of the past.

The digital transformation of mining & metals sectors could unlock \$320 bn in value over the next decade, with a potential benefit of approximately \$190 billion for the mining sector and \$130 billion for the metals sector. The total benefit for mining and metals is equivalent to 2.7% of industry revenue and 9% of industry profit. This is forcing mining companies to focus their operational investments on big data and IOT to maximize yield recoveries and improve operational efficiencies.

To help mining companies align their strategy and operations towards innovation, moving from digital laggards to digital first movers, extract further value from the evolving mine tech ecosystem, engage & train tomorrow's digital workforce, Clariden Global would like to warmly welcome you to our **Digital Mines Conference: Building Fully Autonomous Mines From Pit to Port**, in Perth, Australia.

FEATURED SPEAKERS

HON BILL JOHNSTON MLA
Minister for Mines and Petroleum
Member for Cannington

CONFERENCE HIGHLIGHTS

DIGITAL MINES: BUILDING A FULLY AUTONOMOUS MINE FROM PIT TO PORT

GOLD FIELD'S IIOT DEPLOYMENT STRATEGIES IN GOLD MINES

HOW ANGLO AMERICAN REALIZES MAJOR BENEFITS IN AUTOMATION

IMPROVING MINING OPERATIONS WITH BIG DATA ANALYTICS

ROY HILL'S CASE STUDY ON ARTIFICIAL INTELLIGENCE IN MINING EXPLORATIONS

HOW DRONES ARE CHANGING MINERAL SURVEILLANCE, SITE OPERATIONS AND MONITORING

MINES OF THE FUTURE: 5G FULLY AUTONOMOUS MINES BY 2020

IMPROVING MINING ASSET PERFORMANCE WITH DATA ANALYTICS

WORKPLACE SAFETY WITH IOT INNOVATIONS

INTELLIGENT MINING WITH BIG DATA ANALYTICS

INTEGRATING IOTS WITH MINERS TO TRACK EFFICIENCIES, OUTPUT AND PRODUCTIVITY

SAFETY REGULATION IN THE AUTONOMOUS MINES

MINING CHIEF TECH OFFICER PANEL DISCUSSION

12 APR
FRI 7

POST-CONFERENCE SITE TOUR

DIGITAL MINING AUTOMATION EQUIPMENT SITE TOUR

With rapid transformations to drone technology, the adoption and expansion of drone usage is increasingly cutting across industries. With these advances come challenges including how to conduct operations within Civil Aviation Safety Authority regulations, and manage various privacy and security issues.

Clariden Global have partnered with Global Drone Solutions to bring you this workshop, to learn about the latest industry advances in drone technology and hear from industry experts on how they utilise drones in their business. The workshop includes drone demonstration and attendees will also be given the opportunity to view various different drone platforms.

Data, technology, and new ways to use both are increasingly transforming the mining sector worldwide. From drones to automation to data collection and analytics and more, miners now have the cutting edge of science to help them slash down the inefficiencies and hazards that have long plagued mining operations. See it for yourself on a tour of Curtin University's HIVE (Hub for Immersive Visualisation and E-research), an advanced facility dedicated to immersive data visualization and simulation. You will be treated to virtual reality tours of some Western Australian mining sites that are making strides towards digitization and automation, as well as get a glimpse inside the Pawsey Supercomputer Center, one of only two of its kind in Australia.

HERE ARE

10 REASONS WHY YOU SHOULD ATTEND THE CONFERENCE

A convenient, strategic platform to meet with leading Mining companies, MET providers, Mine Tech pioneers and IoT leaders

Discover new mining digitisation trends and mining tech adoption opportunities for the recovering mining sector

Mining tech companies, start-ups and unicorns will display and discuss current and up-and-coming projects & tech offerings which can drive the mining service arena to new heights

Deep dive into the process of de-minifying humans from the mines and the challenges faced by companies as they reshape their organizations

Analyse the future of Manufacturing, Equipment, Technology and Service Companies (METS) and how this sector will drive innovation and new tech investments

DIGITAL MINES: BUILDING FULLY AUTONOMOUS MINES FROM PIT TO PORT

Opportunities for mature miners to upskill themselves with the knowledge of new mining IoT tech; at the same time, championing diversity and inclusion opportunities for all in Mining Tech

Learn the best practices and case studies of leading mining companies which had pioneered mining digitization

Explore new project opportunities for the adoption and application of new mining technologies

Evaluate risk and returns in investing in new disruptive mining technologies, ascertain possible ROI for your company

Understand the impact of disruptive innovation through AI, IoT, Robotics, Autonomous Vehicles, Drones, and how to customize their adoption to your specific mining mineral

DISCOVER

WHO YOU WILL MEET AT THE CONFERENCE

10 APRIL, EVENING: CHAMPAGNE NETWORKING SESSION

Enjoy a glass of champagne whilst networking with other like-minded individuals on topics that are of most interest to you and fellow delegates.

Who You Will Meet:

SENIORITY LEVEL OF DELEGATES

70%

Director Levels & Above

10%

11:30 Future X Architecture for Mining: A Connected,
Digital Platform for Creating Safer, More Efficient
and Productive Mines

Learn how mining business can benefit from a new
communications architecture, and discover how:

- A mission-critical private LTE network will support robust wireless, multi-service coverage and capacity, offering a unified, future-proof infrastructure for mobile broadband, PTT/PTV, CCTV, IoT and future AR/VR applications.
- Multi-access Edge Computing (MEC) technologies provide the flexibility, scalability and universal availability of computing power, data and intelligence, while supporting ultra-low latencies required for automation and autonomy.

- Digital value platforms ensure that mining companies can turn the masses of data collected from a vast multitude of sensors, cameras and systems into actionable insights from pit to port.
- The above technologies are helping mining operators to create value, through business-centric applications and cross-domain collaboration with ecosystem partners along the full value chain

MARC JADOUL
Strategic Marketing Director
Nokia

NOKIA

12:00 Connecting Your Mine to the Future - Axon Digital
Ecosystem

Connecting your mine to the future will require a flexible, integrated and open standard communications ecosystem. Choosing the right digital ecosystem will determine how much data and what advanced applications a mine can deploy to ensure maximum flexibility and uptime. We will review how miners are achieving scalable and flexible digital ecosystem, and how to avoid getting locked to one solution or technology when deploying the next generation productivity and safety optimisation systems.

MAIN CONFERENCE AGENDA

DAY 1

16:00 Case Studies - Mining Tech Innovations and the Exploration and Processing of Minerals and Metals Through:

A. Data Analytics in Mining

ONUR KARAKAYA
Director, Mineral Exploration and Production
Yilmaden Holding Inc.

B. The State's Strategic Investment in the Future of the Mineral's Sector: Focusing on Innovation and the Digital Economy

ANIL SUBRAMANYA
Research Portfolio Manager
Minerals Research Institute of Western Australia

- C. Satellite Communications for Mining
- D. Deep Learning in Downstream Processing
- E. Open Source Platforms for Mobile Equipment
- F. Shovel Sensing
- G. Mine to Mill Optimisation
- H. Seabed Mining Latest Tech
- I. Longwall Automation Technology
- J. Driverless Trains
- K. Blockchain

16:30 Building a World-class Autonomous Fleet Management System Plus Retro-fitting Existing Trucks, Loaders and Equipment's to Autonomous Capabilities

DR JOE CRONIN
Automation Project Manager
Resolute Mining Limited

17:00 Safety Regulation in the Autonomous Mines of Western Australia

ANDREW CHAPLYN
Director Mines Safety
Department of Mines, Industry Regulation and Safety

17:30 Closing Remarks by Conference Chairman

17:35 Champagne Networking

After a long day of learning, benchmarking, and planning, unwind and mingle with your peers

PLATINUM SPONSOR

Emerson is a global technology and engineering company providing innovative solutions for customers who want to translate technology investments into Top Quartile performance. Emerson Automation Solutions offer scalable, secure technologies, expertise and services that will ensure that IIoT investments deliver on the promise of digital transformation.

<https://www.emerson.com/en-au/automation-solutions>

SILVER SPONSORS

Nokia creates the technology to connect the world. We develop and deliver the industry's only end-to-end portfolio of network equipment, software, services and licensing that is available globally. Our customers include communications service providers whose combined networks support 5.7 billion subscriptions, as well as enterprises in the private and public sector that use our network portfolio to increase productivity and enrich lives.

Through our research teams, including the world-renowned Nokia Bell Labs, we are leading the world to adopt end-to-end 5G networks that are faster, more secure and capable of revolutionizing lives, economies and societies. Nokia adheres to the highest ethical business standards as we create technology with social purpose, quality and integrity.

www.nokia.com

MST Global was a pioneer in the digitisation of mines. Operating in mining communications since 1989, MST installed the first mine wide, operational Wi-Fi/IP network at an underground mine in Canada in 2004.

Since then MST has remained at the forefront of underground digital networks by investing heavily in new network elements and devices that has seen our IMPACT digital suite of technologies installed in over 120 mines around the world.

LTE/5G Underground:

There is a lot of talk about LTE/5G in underground mines, but few have put in the serious development effort to enable LTE to be taken underground in a practical and reliable manner - MST has.

MST identified the operational opportunities offered by LTE for underground mining several years ago, but our deep digital experience also identified the challenges to make the implementation of LTE underground practical and reliable. We have undertaken a major upgrade of our network infrastructure to ensure LTE can be supported and rolled out in any underground operation.

Software and Business Intelligence Applications:

We also invest heavily in software and Business Intelligence applications. This investment is building up a portfolio of software applications to extract further value from various data sources, which can then be used to better manage underground processes.

www.mstglobal.com

BRONZE SPONSORS

As the cloud company powered by **SAP HANA®**, SAP is the market leader in enterprise application software, helping companies of all sizes and in all industries run at their best: 77% of the world's transaction revenue touches an SAP® system. Our machine learning, Internet of Things (IoT), and advanced analytics technologies help turn customers' businesses into intelligent enterprises. SAP helps give people and organizations deep business insight and fosters collaboration that helps them stay ahead of their competition. We simplify technology for companies so they can consume our software the way they want — without disruption. Our end-to-end suite of applications and services enables more than 425,000 business and public customers to operate profitably, adapt continuously, and make a difference. With a global network of customers, partners, employees, and thought leaders, SAP helps the world run better and improve people's lives.

For more information, visit www.sap.com.

DyFlex Solutions are an Australian owned SAP Gold Partner with extensive experience in Mining and related sectors with offices in Perth, Adelaide. We are the "SAP Mining experts", with a proven track record, delivering outstanding results and rapid time to value to our clients.

Our recent projects include:

- * Oz Minerals
- * Covalent Lithium
- * Mine Site Technology
- * Tianqi Lithium
- * Goldfields
- * Red 5

Our Packaged Mining Solutions are based on the SAP HANA Platform and include DyFlex SAP S/4HANA for Mining, SAP Ariba Procurement Automation, Success Factors for HR and the latest SAP Asset Central and Asset Intelligence Network solutions.

All our projects are enhanced by our unique DyFlex SAP accelerators which add significant value and efficiency to the testing, migration, training and deployment process and are supported by a pragmatic project management approach.

As the recognised leader in Mining and SAP Cloud technologies, DyFlex is the perfect partner to assist you in your journey to Digitalisation, whether you are transitioning to Cloud or plan to leverage Big Data, IOT, AI or Automation, DyFlex is here to help.

<https://dyflex.com.au/>

SPOTLIGHT SPONSOR

MineWare supports over 280 systems across more than 130 surface mining operations around the world to improve their performance and productivity. Delivering productivity gains of up to 16%, while reducing costs, MineWare's monitoring systems provide sites with independent machine guidance and payload monitoring information for their large ground engaging machinery in real-time.

Argus and Pegasys empower operators make fast, confident and correct decisions on a range of production, mine planning, truck loading and maintenance tasks—via one integrated system for draglines, electric shovels or hydraulic excavators (both backhoe and shovel configurations).

MineWare, a Komatsu company, has been a key development partner for leading mining institutions for over 12 years with a continuous focus on research, system improvement and world class customer service with a 24/7 remote support team.

www.mineware.com

SPOTLIGHT SPONSORS

PETRA's® suite of highly scalable and platform agnostic AI algorithms are successfully deployed by mining and oil and gas companies around the world. Hundreds of FORESTALL® prediction algorithms are preventing unplanned downtime and enabling process optimisation by predicting process variables in real-time. FORESTALL was a finalist in the Austmine 2017 Innovation Award. MAXTATM digital twins for value chain optimisation ingest 10s of millions of tonnes of ore data to predict and simulate plant performance using AI. MAXTA digital twins have been successfully used for geometallurgical prediction, drill and blast simulation and process control simulation. MAXTA machine learning models are readily deployed across the value chain from mine planning right through to advanced process control.

www.petradatascience.com

Orica (ASX: ORI) is the world's largest provider of commercial explosives and innovative blasting systems to the mining, quarrying, oil and gas and construction markets, a leading supplier of sodium cyanide for gold extraction, and a specialist provider of ground support services in mining and tunnelling.

Our purpose is to make our customers successful, every day, all around the world. We take pride in operating safely, responsibly and sustainably. Together, these enable us to grow and create enduring value for our shareholders.

www.orica.com

EXHIBITOR

Australian Diversified Engineering (ADE), is passionate about haul road operations and improving a fundamental aspect of open cut mining. The haul road is the backbone of the mine and deficient dust management practices can cause an increase in production cycle times as haul trucks must manage adverse operating conditions. Mines are unfortunately well accustomed to living with overwatered roads and the heightened risk of vehicle accidents, as well as ineffective dust suppression resulting from underwatering.

The ADE Spray system revolutionises the mine water truck as operators simply select a Water Coverage Rate. The Water Coverage Rate is the amount of water applied to the haul road and ADE Spray will consistently apply the water rate to the haul road. Mines love the simple spray rate terminology that is easily understood and communicated. Mines looking to improve haul road safety and road maintenance programs are now measuring haul road friction. Road friction results can be used to set spray parameters and restrictions.

The once analogue water truck is now digital, data is stored locally or can be sent remotely. The ADE Spray system has the ability to be remotely monitored and controlled and the next evolution might just be an autonomous water truck.

www.ade.net.au

EXHIBITORS

Established in 2009, **Portable Analytical Solutions** delivers comprehensive knowledge and support across an extensive range of instruments and applications.

Our services include: User Training; Compliance Standards; Rental Options; Factory Support; Multi-technology Solutions. And cover applications in the Precious Metals, Industry, Mining, Exploration, Defense, Environment, Consumer, Medical and Research sectors.

Our expert team draws on more than 20 years of experience in the development, sales and support of sophisticated analytical instrumentation for commercial and scientific purposes.

Working with XRF (Niton), NIR (ASD), LIBS (Rigaku), Hyperspectral (Headwall) and FTIR (Agilent) technologies, and with experience in the development of analytical solutions, PAS has an intimate knowledge of the specific product to suit what you need to do.

We get real satisfaction out of finding the precise solution for your specific application which may be quite different to that of another user of the same product, in the same industry. There is no one-size-fits-all answer in this constantly-changing market so you need to be dealing with the best.

www.portableas.com

Beijing Soly Technology Co., Ltd. is a high-tech enterprise owned by China Shougang Group. For ages, Soly places a high value on automatic, informationalized, digital and intelligent technology and production research and system integration for metallurgy, nonferrous mines, gold mines, coal mines, and other mining industry, as well as pelletizing and sintering process. At present, the company is the integrator of intelligent system for mining industry with the most comprehensive strength in China.

Beijing Soly Technology Co.,Ltd. has close cooperative relations with Siemens, Schneider, ABB, NMT and other well-known enterprises. At the same time, many foreign mining enterprises visit our company and Shougang Mining Company for technology intercourse and investigation, and express a strong intention of cooperation.

Browse our website www.soly.com.cn for more information.

MEDIA PARTNER

National Resources Review is a quality mining and energy magazine which offers in-depth stories from Australia with a link to the world. Content includes prominent national and international industry news, government policies, topical features, projects in progress, company overviews and recent industry accomplishments. The unique coverage makes National Resources Review a vital source of information on sustainability, health and safety, innovations, industry skills and investment updates together with profiles of new entry as well as major players in the resources industry.

<https://www.nationalresourcesreview.com.au/>

ASSOCIATION PARTNERS

CAMEC is an association of companies who are actively involved in the mineral and mining exploration sector in Cambodia.

CAMEC is committed to working constructively with the Royal Government of Cambodia to develop a mining industry we can all be proud of and which benefits all Stakeholders. <http://camec-cambodia.com/>

Hong Kong International Mining Association (HKIMA) is a Hong Kong-based organization established in 2012. The co-founders are experienced senior executive members of global mining and financing listed companies.

The mandate of the association is to promote the exchanges and cooperation in the mining and financial markets among Mainland China, Hong Kong and overseas. As Asia's financial hub, Hong Kong, with its strategic geographic location, international market context and well established legal system, provides an ideal platform for such purpose.

If you are interested to learn more about our association, please email us at elsie@hkima.hk.

The Malaysian Chamber of Mines' primary objectives are:

- To protect, promote and advance the general interest of the minerals resource community in Malaysia,
- To collect, classify and diffuse minerals resource information,
- To consider all questions connected with the minerals industry and promote public discussion thereon,
- To communicate and exchange information on minerals resource industry matters to and with other minerals industry associations in Malaysia and elsewhere,
- To promote and facilitate the minerals resource industry contribution to sustainable development within the national and global sustainable development strategies.
