# POST FORUM SITE TOURS

4 SEPTEMBER 2019 | RADISSON BLU PLAZA HOTEL SYDNEY

## SITE TOUR A: AUTONOMOUS NSW SHUTTLE DEPLOYMENT SITE TOUR AT SYDNEY OLYMPIC PARK

The state government of NSW has recently reinforced its position on driverless technology, committing to a new “Centre of Excellence” for autonomous cars. In this site tour, you will visit recent deployment of autonomous shuttle at Sydney Olympic Park and Armidale CBD where you will discover the deployment challenges and learning lessons from autonomous shuttle. The five-kilometre route is currently the **longest driverless shuttle deployment in Australia** and, due to the city’s challenging road infrastructure and terrain, is understood to be among the more complex routes for automated vehicles.

## SITE TOUR B: MOSMAN COUNCIL SMART PARKING

Parking is one of the great banes of traffic; an IBM study found that approximately 30% of a city’s traffic congestion is caused by drivers searching for a parking spot. But smart parking systems are now making it easier for drivers to find vacant parking spaces, in turn freeing up the roads - which benefits drivers, commuters and the environment alike. In Mosman, where a 2016 survey revealed that 33% of locals think traffic and parking will be the big issue facing the area over the next decade, such technology is already taking off. Join us for a visit to Mosman Council to see their smart parking tech in action: **how it improves the parking user experience, what challenges were faced and overcome, what opportunities for improvement remain and more.**

## Bronze Sponsor

**Klarrio** is a global professional services organisation, headquartered in Europe. We custom build real-time IoT, big data, and streaming analytics solutions using open-source technologies. Leveraging our cloud-native application expertise, we enable our clients to define and accelerate their IoT and analytics implementation through the adoption of new economy business models, disruptive technologies, and cloud-native value-added services on public or private clouds. We provide our clients with four integrated services to help them: develop event-driven, data-centric strategies; build scalable, real-time data handling platforms; operationalise data science applications; and operate data platforms. We also provide general data protection regulations (GDPR) compliance and the needed data security and governance. We have built real-time streaming data platforms for a number of large European corporations, including a massively scalable operational IoT platform

## Advertiser

**tm stagetec systems** is a technology systems integrator. The company, with its headquarters in Sydney, provides seamlessly integrated digital PA systems and services with a focus on the transport industry.

Using the latest, cutting edge technology, digital PA systems take public address to the next level. The systems can operate on any scale and are highly intuitive for users to operate. From a straightforward system design with one speaker, through to configurations involving many speakers; digital PA provides an easy to use audio system that is effortlessly customised and completely networkable.

digital PA systems from tm stagetec systems offer very high quality announcements with a focus on speech intelligibility and accessibility; including hearing loops and help and information points. As well as public address, the other main areas of expertise within tm stagetec systems are; Passenger Information Displays, Mobile PA and Centralised Monitoring. Visit [www.tm-systems.com.au](http://www.tm-systems.com.au) to find out more.

## Association Partner

The **NSW Taxi Council** is the peak body for the NSW Taxi Industry. It represents taxi networks, owners and operators, and it also advocates for better outcomes for NSW taxi drivers.

The NSW Taxi Council represents members across Metropolitan Sydney, as well as Country and Regional NSW.

In NSW there are over 4,000 licence owners, in excess of 200 authorised taxi networks, over 5,000 taxi operators and more than 30,000 authorised drivers. Therefore the industry is the livelihood of over 40,000 people and their families.

The NSW Taxi Industry is a major contributor to the state's public transport system. It provides over 130 million passenger journeys each year and it meets customer travel needs right across NSW. It functions as a door through door transport service that operates 24 hours a day 7 days a week. The NSW Taxi Industry also provides services at times when other forms of public transport either significantly reduce service levels or cease operations altogether. Taxis are often the only form of public transport for some members of the community, and they provide essential transport services to some of the most disadvantaged people in the state. The NSW Taxi Industry was the first private transport provider to offer transport services for passengers travelling in a wheelchair. In fact, our history goes as far back as 1980 when the first wheelchair accessible taxi was established.
